Microsoft Azure Fundamentals Training Bootcamp

Azure Bot Service Fundamentals 101

What is a Bot?

- ❑ A bot is an app that users interact with in a conversational way, using text, graphics (such as cards or images), or speech

- ❑ A bot interaction can be a quick question and answer, or it can be a sophisticated conversation that intelligently provides access to services

Bot Service

- ❑ Azure Bot Service and Bot Framework offer an integrated set of tools and services to build Bots in Azure
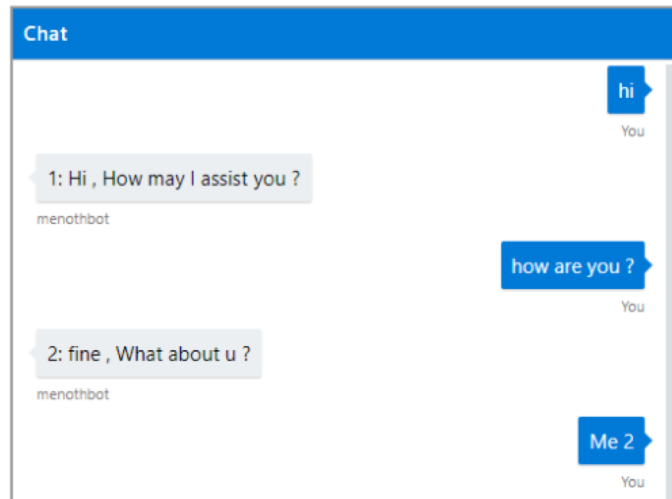

Azure Bot Service Overview

- Azure Bot Service is Microsoft's artificial intelligence (AI) chatbot offered as-a-service
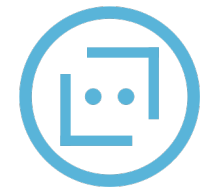

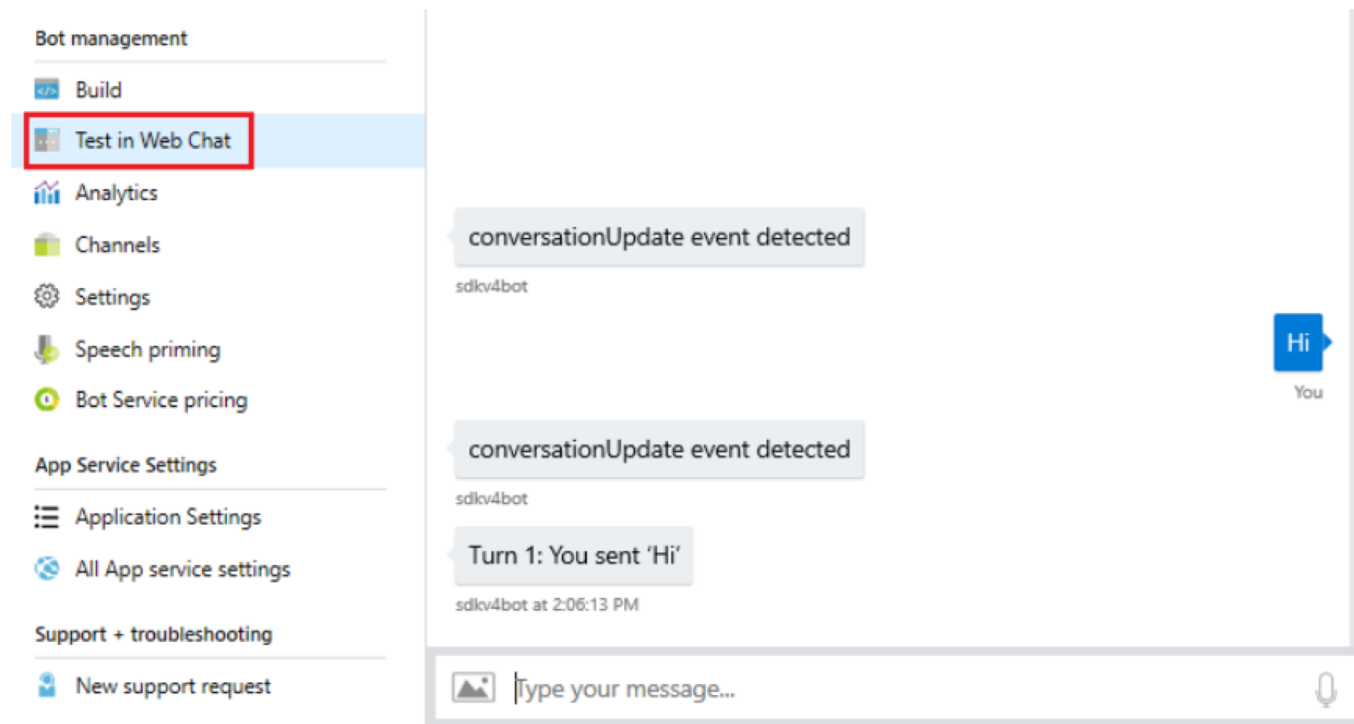

- Start simply …   and grow in sophistication

Azure Bot Service – Optional Further Learning

☐ Create a bot with Azure Bot Service
  ☐ https://docs.microsoft.com/en-us/azure/bot-service/abs-quickstart?view=azure-bot-service-4.0
